We set ourselves a clear goal:

TRACK 2030
The Röhm Sustainability Program

By 2030 we want to reduce the carbon dioxide emissions, which result from the production or sales of Röhm products, by 30% per ton.

Röhm on the path to **Climate Neutrality 2050**

By 2050, we will not generate any more greenhouse gas emissions and therefore produce climate-neutral.

Röhm is one of the leading manufacturers in the methacrylate business

- **3,500 EMPLOYEES**
- **13 PRODUCTION SITES WORLDWIDE**
The project will strengthen the reliability of our supply chain towards our valued customers in the Americas and globally. We are on track and expect to start-up production in first half of 2024.

LiMA is the most efficient MMA production technology developed so far:
The technology enables a high yield with low energy consumption and reduced wastewater volumes.

The new plant will have a production volume of:

250,000 TONS OF MMA
